Experience **Frontend Engineer** 2017 - 2019

Ascendify, San Francisco, CA

- / Worked on data-driven ReactJS / Redux projects and built reusable components for cross-browser compatibility in an agile environment
- / Developed Ascendify latest flagship product using ReactJS / Redux: Talent Matching (helps recruiters/hiring managers find candidates for jobs)
- / Led Ascendify most complex client website project: TTEC - 30 pages, across 5 languages in 90 days with heavy usage of JavaScript and CSS
- / Worked with leadership, marketing, and design teams to completely redesign and develop Ascendify new website (www.ascendify.com)
- / Developed 15+ high-quality, user-friendly client sites leveraging Ascendify widgets using HTML5, CSS3, JavaScript, PHP in MVC pattern
- / Wrote 20+ pieces of technical documentation on reusable components, processes, frameworks, and templates
- / Fixed 150+ tickets (bugs, design/development requests) with quality, detail-oriented, and creative problem-solving techniques

Web Developer 2014 - 2016

Apttus, San Mateo, CA

- / Maintained corporate website using HTML5, CSS3, JavaScript, Wordpress
- / Developed 15+ new pages and email templates
- / Optimized website speed and performance
